 -  Carrot
 -  Honey Pot

Farmers from around the world grow carrots from Oregon carrot seeds.

Carrot Flowers

Did you know that one honey-bee hive can produce up to 80 pounds of honey a year?

Field Notes:

Honey bees are pollinators of agricultural crops worldwide. That's because they pollinate many different types of plants (some other bee species are very picky eaters), and they are easy to manage. For hundreds of years, beekeepers have known how to raise them in portable nests that they can move from field to field. Honey bees make tasty honey, too, which is how they got their name. They are medium-sized bees that range in color from black to pale yellow. Colonizing Europeans brought honey bees to North America starting in the 1620s. In Oregon, they are one of the only pollinators of carrots, which Oregon farmers mainly grow not for the vegetable, but for the seeds produced by carrot flowers.
