**Fruit: Store Well, Waste Less**

**Apples:** Store up to 6 weeks in the refrigerator in a crisper drawer or open plastic bag.

**Bananas:** Store at room temperature. Once ripe, bananas can be refrigerated for up to 2 weeks; the skin may turn black but the fruit inside will be fine.

**Berries:** Refrigerate in a covered shallow container with holes for air movement. Use strawberries and raspberries within 3 days, blackberries within 5 days, and blueberries within 10 days.

**Kiwi:** Store unripe kiwi in a plastic bag in the refrigerator for up to 6 weeks. To ripen, put firm kiwi in a paper bag on the counter away from heat and light. Ripe kiwi will keep for several days at room temperature and up to 4 weeks in the refrigerator.

**Peaches:** Store at room temperature until ripe. Check daily until soft, then eat or refrigerate in a plastic bag with holes and use within a few days.

**Pears:** Store at room temperature until ripe. Press gently near the stem. If the neck feels soft, the pear is ready to eat. Once ripe, use within 5 days or refrigerate for longer storage.

**Freezing Tips:** For longer storage, freeze washed, whole or cut fruit on a baking sheet. When firm, transfer to a freezer container. Label and date. Use within 1 year for best quality.

### Tastes great on these Food Hero recipes:
- ✽ Apple Spiced Baked Oatmeal  
- ✽ Applesauce French Toast  
- ✽ Favorite Pancakes  
- ✽ Gingerbread Pancakes  
- ✽ Oven French Toast (pictured)
**Ingredients**

1 ¼ cups all-purpose flour  
1 Tablespoon baking powder  
1 Tablespoon sugar  
½ teaspoon salt  
½ teaspoon spice such as cinnamon, nutmeg or allspice, if desired  
1 egg  
1 cup nonfat or 1% milk (add 2 more Tablespoons for thinner pancakes)  
2 Tablespoons vegetable oil  
1 teaspoon vanilla, if desired

**Directions**

1. Mix together the flour, baking powder, sugar and salt in a medium bowl. Add the spice, if desired.
2. In a separate bowl, beat the egg until well blended. Add the milk and oil. Add the vanilla, if desired.
3. Add the dry ingredients to the liquids and stir just until the lumps disappear.
4. Lightly grease and preheat a large skillet over medium-high heat. The skillet is hot enough when a few drops of water sprinkled on it skitter and bounce around.
5. Pour ¼ cup of batter per pancake onto the hot skillet. Cook until bubbles come to the surface of the pancake and the edges start to look dry. Turn over. Cook until cooked through and the bottom is golden brown.

**Variations**

✪ This batter also works great in waffle makers!
✪ No eggs? Replace them with 2 Tablespoons water.
✪ Replace the milk with buttermilk. Also reduce the baking powder to 2 teaspoons and add ½ teaspoon baking soda.
✪ Add ½ cup of fruits or vegetables to the liquid ingredients. Try grated or minced fresh apples, berries, mashed bananas, canned pumpkin, grated carrots or zucchini.
✪ Replace up to half of the flour with whole-wheat flour.
✪ For oatcakes, replace ½ cup of the flour with oats. Soak the oats in the milk for 5 minutes before mixing them into the batter.

**Tip for Pouring Batter**
A gravy ladle or large liquid measuring cup are great tools for pouring muffin batter into tins and pancake batter onto the skillet.

Back to Contents
**Ingredients**

8 cups bread cubes; try whole-grain bread  
2 cups fruit, sliced or chopped—fresh, frozen or canned  
4 eggs, slightly beaten  
1 cup nonfat or 1% milk  
2 teaspoons vanilla  
¼ cup sugar

**Topping**

¼ cup margarine or butter, softened  
¼ cup sugar  
½ cup flour, all purpose or whole wheat

**Cooking Dry Beans**

1. **Sort and rinse** to remove stones, seeds, damaged beans and dust.

2. **Soak**—Cover the beans with plenty of water (8 cups of water for every 2 cups of beans). Soak for 6 hours or overnight.

3. **Drain and rinse** the beans.

4. **Cook**—In a large saucepan, add fresh water to cover the beans by at least 1 inch, and bring to a boil. Reduce heat, cover and simmer until the beans are tender. Add water if needed to keep the beans covered with liquid during cooking. Cooking time varies for different beans, but is usually from 1 to 2 hours. The beans are done when you can easily mash them with a fork.

5. **Add flavoring!**

Ingredients

2 teaspoons oil
1 cup chopped onion (about 1 medium onion)
2 cloves of garlic, minced, or ½ teaspoon garlic powder
1 teaspoon ground cumin
1½ cups cooked navy beans or any type of beans (or a 15-ounce can, drained and rinsed; try any type)
3½ cups diced tomatoes (fresh or a 28-ounce can diced with juice)
4 cups chicken broth (any type)
1 cup tomato sauce (an 8-ounce can)
1 cup (two 4-ounce cans) chopped mild green chiles
2 teaspoons dried oregano
2 cups chopped cooked chicken

**Tips for Draining Beef Fat**
Pour beef fat into a metal can (it won’t melt from the heat of the fat) or let it cool slightly and pour it over papers in the garbage can. Pouring beef fat down the sink drain can cause clogging.

Stovetop Rice

1. Add dry rice and water or broth to a pot.
   - 1 cup white rice to 2 cups liquid
   - 1 cup brown rice to 2¼ cups liquid
2. Bring to a boil. Stir once or twice.
3. Cover with a tight-fitting lid. Reduce the heat to very low.
4. Cook white rice 18 to 20 minutes, and brown rice 35 to 45 minutes.
5. Check rice. If it is not tender or there is still some liquid in the pan, cover and cook 2 to 4 more minutes.
6. When done, take the pan off the heat. Remove the lid and fluff the rice with a fork.
Storing Fresh Vegetables

**Broccoli and Cauliflower:** Store in the refrigerator in a grocery produce bag or poke a few small holes in a bag to let air in. For best quality, use within 1 week. Broccoli and cauliflower can be frozen after blanching.*

**Carrots:** Store in a plastic bag in the refrigerator for up to 2 weeks, poking a few small holes in the bag to let air in. Keep carrot sticks for snacks in your refrigerator for up to 1 week; to prevent the sticks from drying out, store in water. Carrots can be frozen after blanching.

**Onions:** Store in a cool, dark, dry place in an open bowl or bag for several weeks. Store peeled or cut onions in sealed containers in the refrigerator and use within 2 weeks. Refrigerate green onions (scallions) immediately. Freeze extra onions (raw or cooked) to avoid waste. Chop and sauté if desired, or slice raw onions and place small amounts in containers in your freezer and use within 8 months in cooked dishes.

**Potatoes:** Store in a dark, cool, well-ventilated cupboard. Use a paper bag or a plastic bag with holes to let air in and keep the potatoes from wilting. New potatoes (small size) stay fresh for 2 to 3 days and mature potatoes (larger size) for 2 or more weeks.

**Tomatoes:** Keep ripe whole tomatoes at room temperature in a single layer in an open container. Avoid direct sunlight. Try to use within 5 days. Short refrigerator storage (3 days) can help delay softening but may also reduce flavor.

**Salad Greens:** Store in the refrigerator covered with a damp paper towel in an open container or in a plastic bag with holes to let air in. Use greens within 10 days.
**Flavored Water Basics**

**Flavor Options**  
*Try these flavors or make up your own!*

1. Slice, tear, or mash the fruit to release the most flavor.  
2. Refrigerate for several hours or overnight to allow the most flavoring.  
3. Use within 2 days for best quality.

**Flavored Ice**  
Don’t let oranges, grapefruit, lemons and/or limes go to waste. Squeeze their juice into a bowl, mix with water and pour into ice trays to make flavorful ice.

**Keep It Safe**  
- Wash all fresh fruits, veggies and herbs by scrubbing or rubbing gently under running water.  
- Do not mix batches of flavored water. Use it up, clean the container, then make a fresh batch.  
- Keep water cold after fruits or veggies are added. Make an amount you can use within 2 days.
Use a **liquid measuring cup** to measure liquids. Set the cup on a flat surface. Fill to the measurement needed by looking at the cup from eye level.

Use a **dry measuring cup** for dry ingredients. Use the size of cup that holds exactly the amount you need. Fill it to just above the rim and level it off with the straight edge of a knife.

Use **measuring spoons** for small amounts of liquids or dry ingredients. Fill level with the top of the spoon.

**Use the fewest number of measurements possible for best accuracy.**

- 3 teaspoons = 1 Tablespoon
- 4 Tablespoons = 1/4 cup
- 5 Tablespoons + 1 teaspoon = 1/3 cup
