

More About Seeds and a Plant Part Recipe

Sunflower

Mixed vegetable seeds

Coriander seeds

Sunflower seeds

A seed contains everything that is needed for a plant to grow except water, healthy soil, air and sunshine. Bees help make seeds. In return, seeds can grow into plants that make pollen to feed bees. Seeds are high in protein. Pumpkin and sunflower seeds are great as a snack or in a salad, cereal or yogurt topper!

Fun Seed Facts!

- ☛ You can carve a pumpkin and roast and eat its seeds, or dry the seeds out and save them to plant.
- ☛ Sunflowers are also a plant with seeds we can eat or dry out and plant.
- ☛ Did you know that strawberries have their seeds on the outside? A strawberry flower is made of many tiny flowers fused into one big flower. The little dots on the surface of a strawberry are the seeds of each flower.
- ☛ How big are seeds? Seeds come in all shapes and sizes. Avocados have one large seed.

Carrot seeds

Avocado seed

Recipe: Plant Part Funny Face Sandwich

1. Cover a slice of bread with a spread.
2. Design a face on top using plant parts.

Spread, such as nut or sunflower butter, hummus, or cream cheese

Leaves, such as lettuce, herbs, or even pesto

Roots such as shredded carrots, radish slices or jicama sticks

Flowers, such as broccoli or cauliflower florets or nasturtiums

Stems, such as celery or chard stems

Fruit, such as apple slices, berries or peppers

Seeds, such as roasted sunflower or pumpkin seeds

Draw your sandwich!
